BACKGROUND

My primary experience in websites related work is to design, develop and implement projects from start to completion. I adhere to a holistic branding approach that emphasize sustainable communication across all platforms. I have worked on independent and contractual website projects for over 4 years. In my work I frequently use web standards, browser compatibility HTML coding, CSS, JavaScript, Flash, PHP and MySQL databases. I also install and customize WordPress content management systems. I have good written, team collaboration, and organizational skills. I have demonstrated the ability to work quickly and creatively under demanding deadlines. I would like to use these skills and experience to help companies brand themselves better while gaining new experience and learning new skills in this field.
